Thanks, Earl; I figured as much. I'm not sure why he called me last week, but he said he wanted me to understand Bayer's position on the data concerns. So, that's why I wrote him the response today to let him know that I'm receptive, but probably am no longer involved with the agency's determination. However, let me know if you have questions.

Marion J.

Calvin,

Calvin spoke with Mr. Nyangulu last week. He is waiting on Bayer's written response.

Earl

James,

Here's hoping all is well! My apologies for missing your call, as I've been out of the office for the latter part of last week; however, I did get your voicemail message(s). While I am very interested in the aldicarb position on the release of data, I want you to know that this issue was referred to the Freedom of Information Office within the Information, Technology, and Resource Management Division (ITRMD) of OPP, as you probably are already aware. I only mention this because I am very unlikely to be a determining factor on what decision is made with regard to CCPR indirect request, but I am, nonetheless, most willing to learn of your perspective. Perhaps, it may be a good idea to talk with both Earl Ingram, Chief of the Public Information and Records Integrity Branch (PIRIB) that manages to FOIA office in OPP and myself simultaneously. If you decide to do so, let us know your availability.

Best regards,

Marion Johnson

Subject: Toxicology Data Package - aldicarb (AgLogic)

Hi Marion,  
It is our understanding that AgLogic has reached out to the Agency for guidance on the WHO/CCPR request to review our toxicology data package for Aldicarb. Before the agency does anything about this request, we would like an opportunity to articulate our company position on the said data package.

I am available for a quick chat at your earliest convenience to discuss this.

Thanks

James
